SUMMARY

I am a full stack web developer with 3+ years of experience and proven knowledge of programming and perseverance, through discipline and deliberate practice. I've learned to code through hard work and perseverance, through discipline and deliberate practice of conventional and modern concepts. Aiming to leverage my abilities to successfully fill the Full Stack Developer role at your company.

EXPERIENCE

Backend Web Developer 12/2021 - 08/2022

Jetron Mall

An e-commerce store that makes users buy and sell at ease.

- I along with a team of developers built a backend web application developed a backend API using modern technologies and I got relevant experiences and exposure using typescript, TTD, image processing, mail automation, PDF generation, GraphQL etc.

Chief Technology Officer 06/2021 - 08/2022

Brigow Homes

An online platform for people to rent, sell and lease properties such as land and houses.

- I gained relevant experiences in teamwork, people management, human relations and other management skills.
- I also was exposed to the usage of modern technologies i.e. MERN, typescript etc.

Full Stack Web Developer 10/2019 - 06/2021

Gilgal House Media

A media company to cover events and post-production in a school community.

- I developed a full stack web application and obtained relevant experiences in data administration, hosting, web server management, CI/CD, git etc.
- I built an CBT application for the company to access new recruits based on some preset questions and interview parameters.

Applications Developer 12/2020 - 03/2021

Hellio Solutions

Hellio Solutions is the largest provider of Cloud Communication in Ghana and throughout the continent.

- The company was able to get more visitors and positive response on the improvement of the user interaction on the site
- I also gained experience from implementing complex functionalities including reading a large excel file with more than 500,000 contacts in chunks and sub account authentication systems.

Full Stack Developer 06/2020 - 12/2020

Urella

A church management platform used in christian churches to manage records and finances.

- I along with a team of web developers built a church management application with features such as attendance tracking, finance record keeping, membership authentication and data presentation and visualization.
